SECURITY INFORMATION

It is possible that heacquarters engineer units of the Fourth Cas Lecz Army were temporarily quartered in the restricted Tiergarten area, together with the hilth Sig Im of the 9th Gas Tank Div, since engineer troops of Fourth Gas Tecz Army headquarters units were observed there by the same source on 5 September. The location of the unidentified artiflery regiment or battalion of the 9th Gas Tank Div in the restricted Kirschenallee, and of the division's 23hth Fort Regt in the Grenadier Kaserne is known from previous reports.	25X1 25X1 25X1
Tank Div has been ientetively carried in the restricted Tiergarten area, and elements of the division's unidentified and regiment in the restricted Schlossfarten area. The present report that there were rocked launchers in the restricted Schlossfarten area indicates that the recked launcher unit may be stationed there. The last report by the same source indicated that, prior to 22 September, the units from Toustrelitz were away for Siele training, probably in the Formalin-Roulrandenburg area.	25X1
